

# Your Highlands Ability Profile

## Verbal Memory

This worksample measures the ability to memorize new words and influences learning through reading and learning the vocabulary of foreign languages. The stronger your Verbal Memory the more naturally able you are to retain and recall information you read (does not necessary apply to comprehending the information) and to master vocabulary of languages and other specialized vocabularies such as medical terminology, legal terminology and scientific terms. Verbal Memory supports studies and work roles in fields such as:

- Anatomy and physiology
- Education classes
- Foreign languages
- Geology
- Geography
- Biology

A strong score in verbal memory is needed in “word and jargon fields” such as:

- Translating and interpreting foreign languages
- Teaching foreign languages
- Historical research
- Information sciences
- Reference librarian
- Data base development
- Medical records development and maintenance
